In this Issue: Member Services News Spotlight—First Quarter 2014

- [Executive Advisory Board \(EAB\) Chair Message](#)

ValuSource Software, a partner of NACVA's for over 15 years, continues to provide members and customers with superior value and a variety of business valuation solutions through software, valuation databases (using Valuation Data Explorer), and online valuation solutions. This past year saw the advent of online downloadable databases—no more waiting for CDs to arrive. You now have instant access available at your fingertips, and the information is downloadable into NACVA's Business Valuation Manager™ *Pro* (BVM Pro), Express Business Valuation (EBV), and Excel.

- [State Chapter News and Update](#)

Another resource ValuSource has added is **ValuSource Software Assistance**.

- [Member Services News Spotlight](#)

Existing users of BVM *Pro* and EBV now have the opportunity to obtain software assistance for \$125 per hour; an expense you can transfer on to your client. It's a little like adding a part-time staff member to your team who is an expert in using the software. The ValuSource Software Assistance program provides you a technical professional to assist you with data input, downloading data (that you already own), and inputting assumptions. This provides ValuSource the ability to input and set up the engagement to generate draft reports using the Business Valuation Report Writer™ (which you need to already own). Once the report is produced, you will need to review and edit it to produce a final report. This service can be very useful if your office is back logged. ValuSource Software Assistance will allow you to complete more valuations and, in turn, acquire more engagements. Or if you are not as familiar with the software as you would like, you can have an expert personally guide you through technical aspects of the software, which will allow you to complete appraisals more quickly in addition to learning how to effectively use the software yourself.

ValuSource does not provide any “judgment” calls; just assistance using the software.
